Ho Chi Minh Head Office
Add: 3rd floor, Thuy Loi 4 Office Building,
No. 102 Nguyen Xi Street, Binh Thanh
Ward, Ho Chi Minh
Tel: 84-28-6290 2512/13
Fax: 84-28-6290 2514

Hanoi Branch
Add: 12th floor, IDMC My Dinh Building, No.
15 Pham Hung Street, Cau Giay Ward, Ha Noi
Tel: 84-24-39446756
Fax: 84-24-39435206

Hung Yen Factory
Add: Lot No. D-10, Thang Long II Industrial
Park, Duong Hao Ward, Hung Yen Province
Tel: 84-221-3744 071/72

ORGANO CORPORATION

Organo USA Inc.

VISION

Organo is developing a global-scale network that will enable more countries and regions to benefit from our world-leading technologies.

Organo serves as a valuable partner company by leveraging its leading-edge technology cultivated through long experience with water treatment, by contributing to the industries that create the future, and by playing a key role in the development of societal infrastructure.

PHILOSOPHY

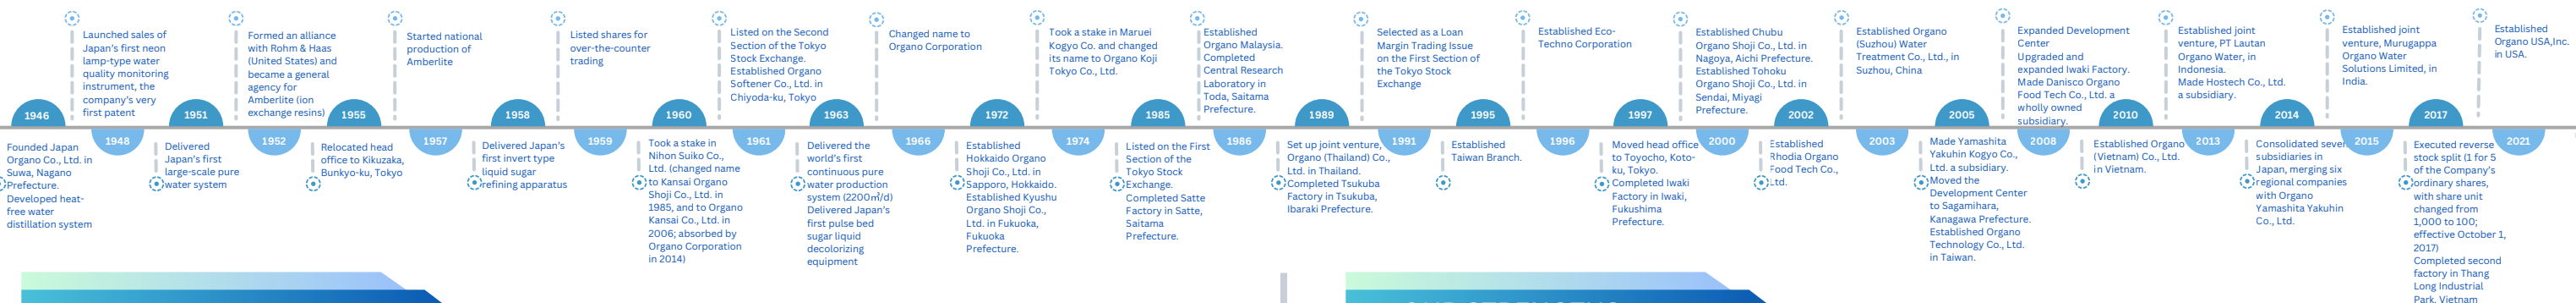

At Organo, we seek to expand our business through high value-added separation and purification as well as analysis and manufacturing technologies, and by providing products and services that promote the creation of value and which resolve the challenges that confront industry and society. We proactively contribute to a better tomorrow by cultivating people today who will improve upon the way things were done yesterday, as a company where all employees are energetic and passionate about their work.

KEY FIGURES

1946
founded

¥ 8,225M
capital

2,660
employees

13
overseas subsidiaries and affiliates

OUR BUSINESS

Our Business as a comprehensive water treatment engineering company, Organo supports the development of daily life and industry with the widest range of equipment and systems in the water purification industry.

PLANT BUSINESS

Providing streamlined systems built on technology that combines functionality with reliability

SERVICE SOLUTIONS BUSINESS

Providing solutions for optimal operation of water treatment facilities

PERFORMANCE PRODUCTS BUSINESS

Meeting diverse requirements at short lead times with ready-made product lines

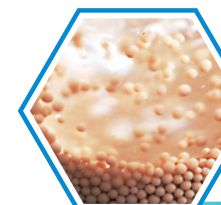

OUR STRENGTHS

Our Strengths from ultrapure water to wastewater treatment, and from water for laboratories to high-volume water for plants, we pursue the possibilities of water from the perspectives of science and technology.

TOTAL ENGINEERING

A comprehensive water treatment engineering company

TECHNOLOGY

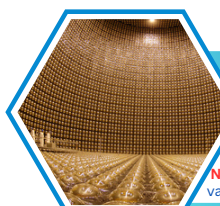

Technological capability built up over more than 70 years

RESEARCH & DEVELOPMENT

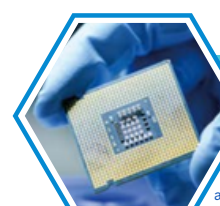

Tireless dedication to cultivating fundamental technologies for a wide variety of water treatment

OUR CONTRIBUTION

SUPER - KAMIOKANDE (2015)

Organo's ultrapure water has found practical application in research laboratories in analytical chemistry and pharmaceuticals production, including Super-Kamiokande, a research facility of the University of Tokyo that contributed to Nobel Prize winning research into neutrinos. Organo makes a highly valued contribution as a key partner of researchers.

DEVELOPING WORLD'S FIRST TECHNOLOGIES

Using our proprietary membrane, we have developed the world's first technology to measure fine particles as small as 10nm (one hundred millionth of a meter). Using the newly developed membrane and filtration technology and continuous automatic observation technology, we have made possible the analysis of 10nm fine particles.

ORBRAID

In 2020, Organo launched energy-saving service solutions featuring ORBRAID Series cooling water treatment agent and earned Energy Conservation Grand Prize 2020

ORMSMART RO

ORMSMART RO, our energy-saving service solutions for RO membrane treatment facilities, earned the Judging Committee Special Excellence Award in the product and business model category of the FY2021 Energy Conservation Grand Prize (sponsored by the Energy Conservation Center, Japan (ECCJ) and supported by the Ministry of Economy, Trade and Industry)

KEY INFORMATION

ORGANO (VIETNAM) is the wholly-owned subsidiary of ORGANO CORPORATION – the leading and pioneer company in Water/ Wastewater treatment business in Japan since 1946. We provide a full spectrum of cutting-edge technologies in Water/ Wastewater Treatment System.

offices & factories

BUSINESS INTRODUCTION

PLANT BUSINESS

- Sewage treatment system
- Industrial WWT system
- DI water system
- Pure water treatment system
- Ultra-pure water treatment system

SERVICE SOLUTION BUSINESS

- Overall maintenance
- Operation management
- Proposal-type service
- Consultancy service

PERFORMANCE PRODUCT BUSINESS

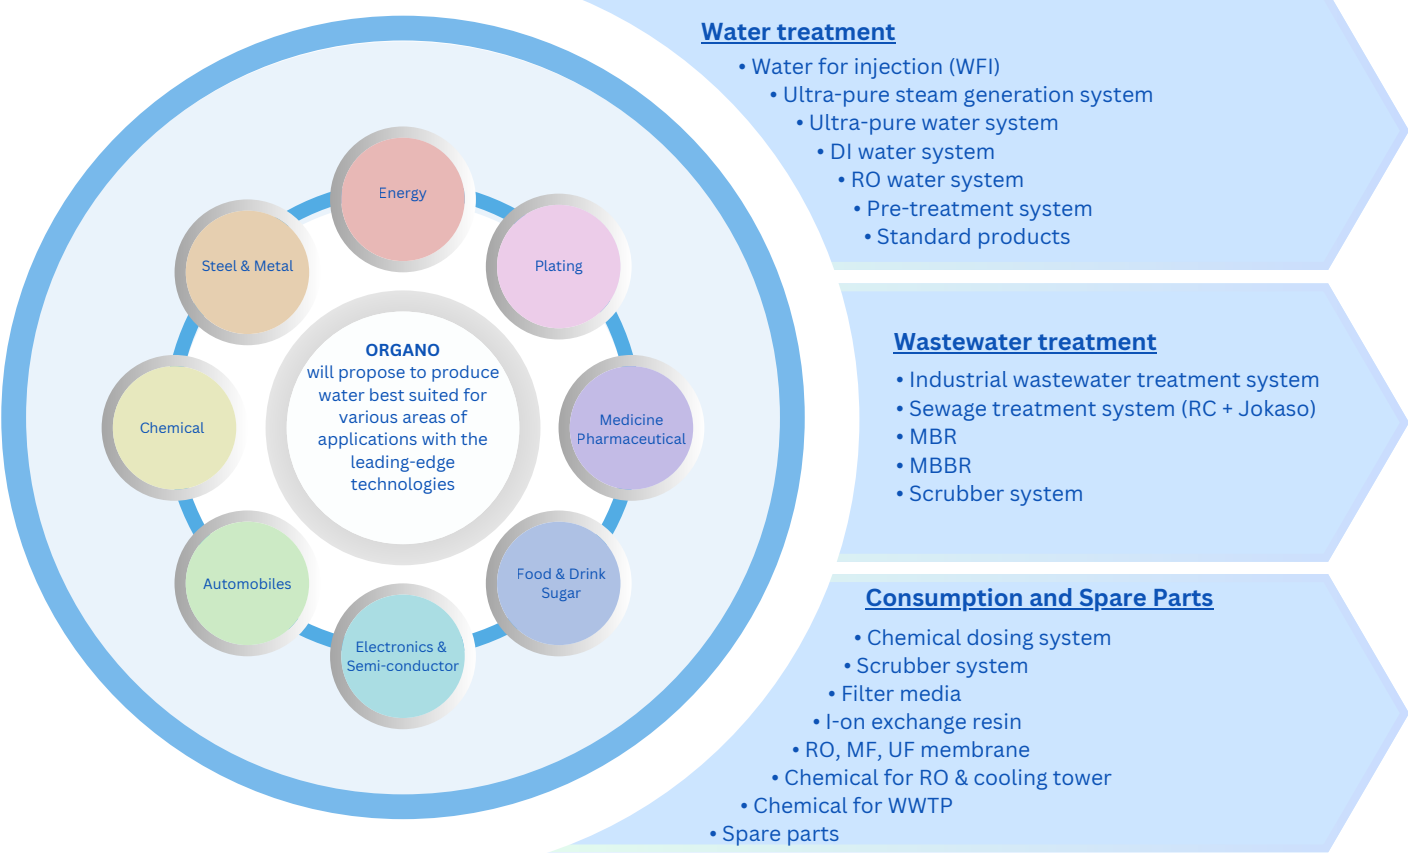

- Standard product
- Spare part
- Cleaning chemical
- Treatment chemical

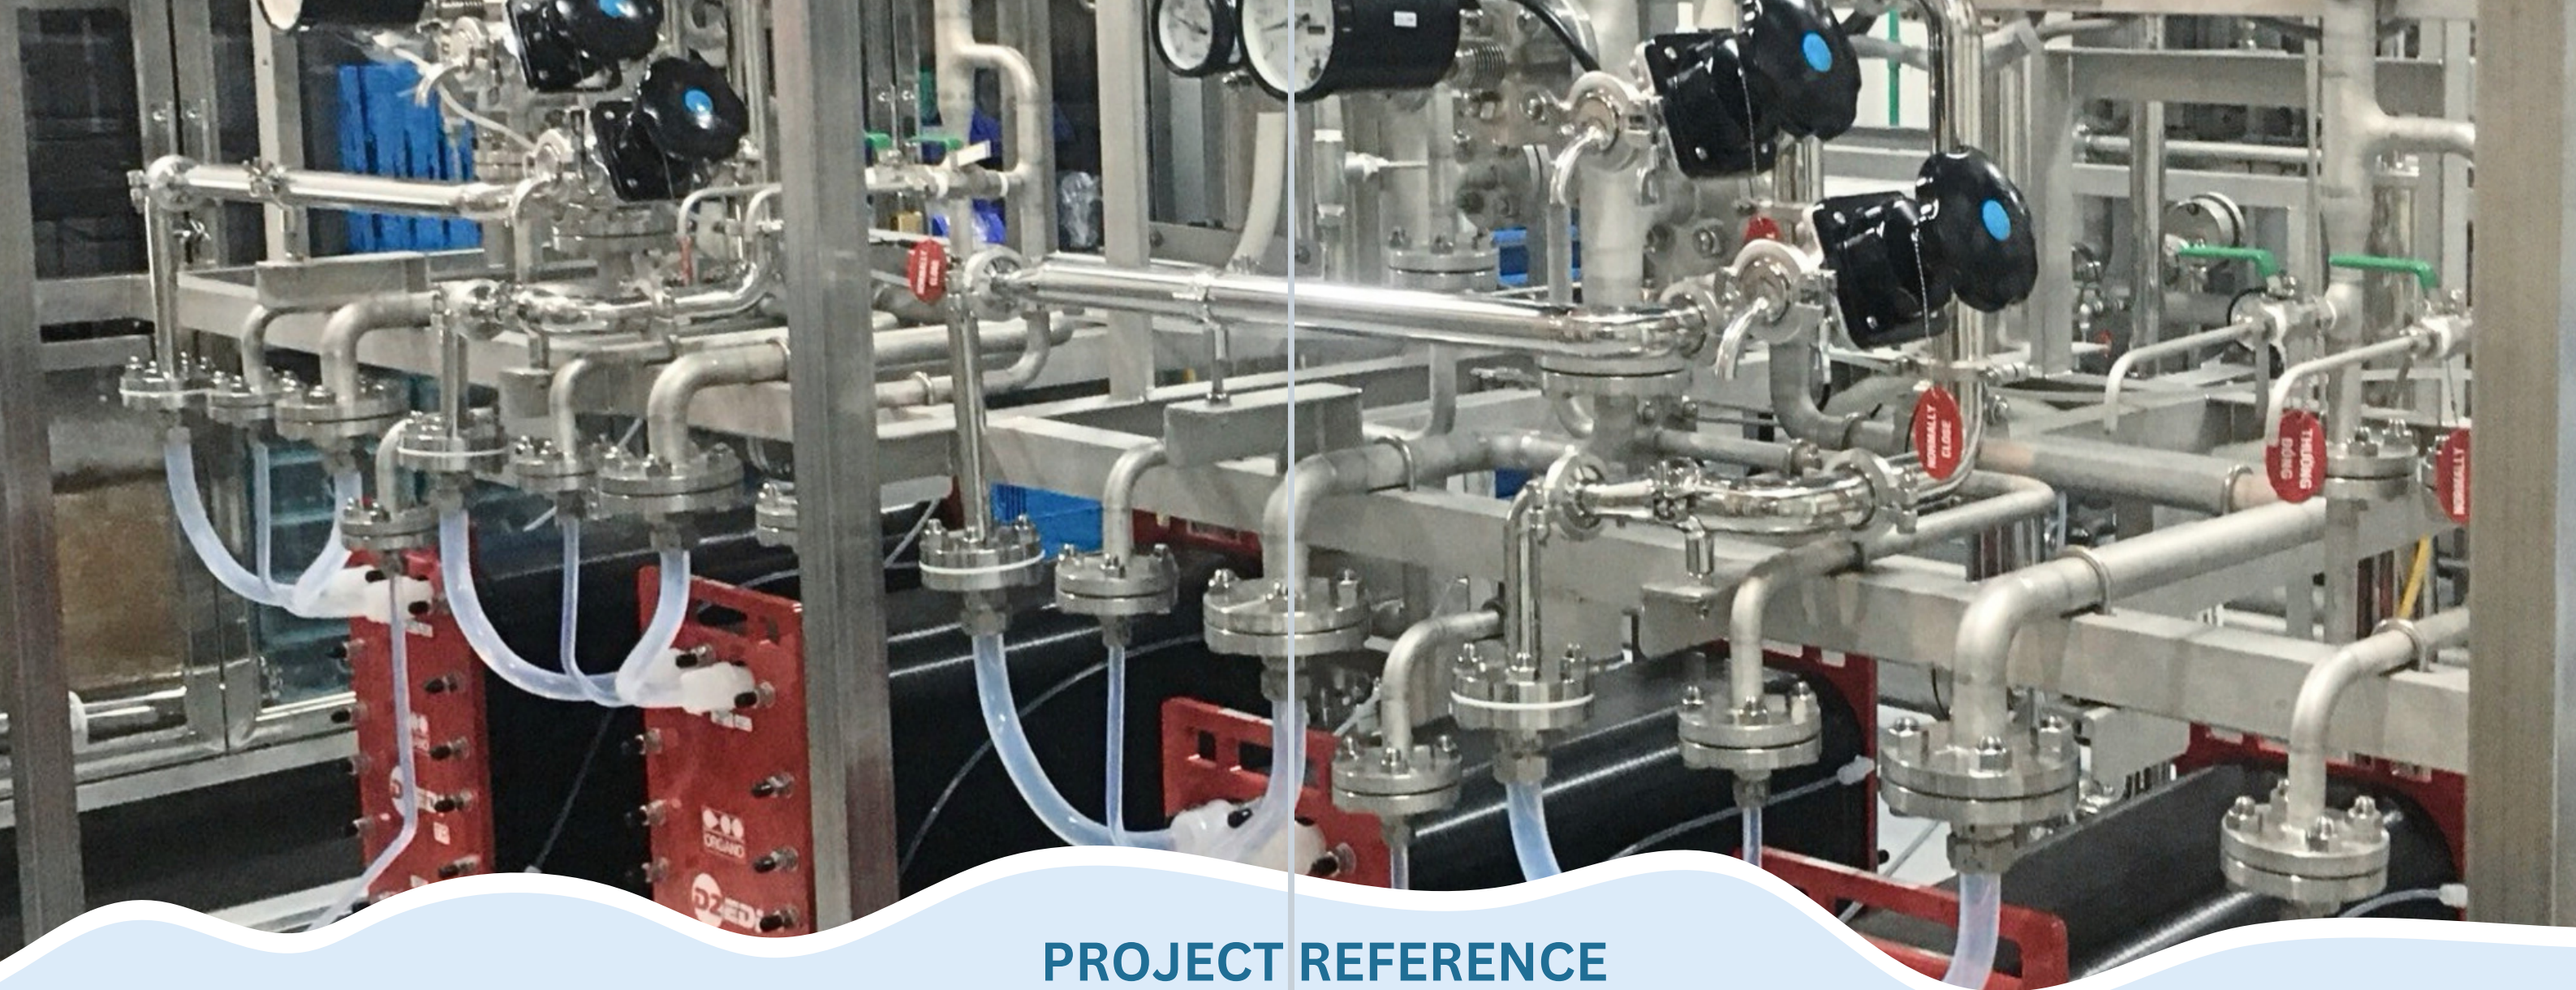

PROCUREMENT NETWORK

MAIN SALES ITEMS

PROJECT REFERENCE

Project name: Water for injection
Location: Quang Minh IP, Hanoi
Year of completion: 2020

Project name: Purified Water System
Location: JI. Pasteur
Capacity: 5.0 m3/h
Year of completion: 2022

Project name: Water for injection
Capacity: 4m3/h (phase 1), (expanded in phase 2)
Year of completion: 2022

Project name: Water for injection
Location: Thang Long IP, Hanoi
Capacity: 1m3/h
Year of completion: 2022

Project name: RO and Ultra Pure Water for Semi-conductor
Location: Vietnam-Singapore IP Binh Duong
Capacity: 15m3/h
Year of completion: 2018

Project name: DI Water Treatment Plant for Thermal Power Plant
Location: Phu My 1, Phu My Town, Tan Thanh
Capacity: 6.5m3/h
Year of completion: 2021

Project name: Water Treatment Plant for Thermal Power Plant
Location: Binh Thuan Province
Capacity: 70m3/h (Service); 30m3/h (Demin)
Year of completion: 2017

Project name: Sewage treatment plant
Location: TLIP I, Dong Anh
Capacity: 11,000m3/day
Year of completion: 2019

Project name: Sewage treatment plant
Location: TLIP III, Vinh Phuc
Capacity: 3,000m3/day
Year of completion: 2019

Project name: Wastewater treatment plant (CN & NI)
Location: TLIP II, Hung Yen
Capacity: 410m3/day
Year of completion: 2012

Project name: Wastewater treatment plant
Location: Bao Loc, Lam Dong
Capacity: 300m3/day
Year of completion: 2014

Project name: Wastewater treatment plant
Location: Quang Minh IP, Me Linh
Capacity: 261m3/day
Year of completion: 2018

Project name: Wastewater treatment plant
Location: Dinh Vu IP, Hai Phong
Capacity: 135m3/day
Year of completion: 2018

Project name: Wastewater treatment plant
Location: TLIP II, Hung Yen
Capacity: 80m3/h, 1760m3/day
Year of completion: 2021
